

# Making your local health record work better for you

This practice is part of the local shared care record initiative. This means it will be possible for you to give permission for other health care professionals to view your GP health record when they are providing you with care.

We have special rules that we must stick to, which protect your information and keep it private and secure.

If you want to know more about how we may share your information and who we share the information with, please ask for a copy of the leaflet 'making your health records work better for you.'

Email [kccg.itsupport@nhs.net](mailto:kccg.itsupport@nhs.net) for more information.
